

Elite Marina System

- 1 Suitable for any single pontoon application to large scale commercial marina.
- 2 Heavy duty concrete pontoon arrangement constructed using reinforced concrete deck and a solid monolithic flotation system protected by a tough and flexible polyethylene skin.
- 3 Smartly finished with a customized aluminum waler that incorporates a unique press-in bump rubber fender which eliminates the need for screws.
- 4 Independent expansion and contraction from the flotation and concrete deck.
- 5 Attractive, durable, element resistant and functional. Single unit range in width up to 5 meters and a length up to 15 meters.
- 6 Concrete deck can be "broom" finished or carpeted.

Reinforced Concrete Deck
Marina for commercial and
domestic use
