

# Superior Modular Docks (SMD)

It is a versatile option where a smart appearance and flexibility is required; the modules are easily demountable and moveable.

The varied sizes allow for multiple layout combinations and are tough and durable, non-slip, UV resistant and do not deteriorate in the harsh marine environment.

The SMD system can withstand heavy conditions and tough treatment, making it ideal for commercial and public use applications.

A variety of custom accessories are also available making the SMD System a popular choice for marine berthing, resort water sports and public use recreational applications.

## Technical Data:

### Deck

CSIRO slip resistant certified, raised tile pattern, self draining with high resistance to impact with 3kpa according to AS 3962

### Resistance to Degradation

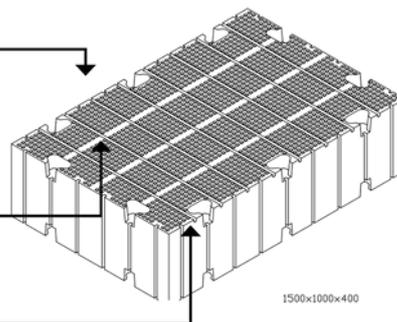

Extremely High

### Temperature Resistance

-10 to +60 Celsius degrees air temperature

### Chemical Resistance

Resistant to most chemicals

Superior Modular Docks are available in 6 different sizes

### Sizes

3m x 2m x 0.4m

3m x 1.5m x 0.4m

3m x 1m x 0.4m

1.5m x 1.5m x 0.4m

1.5m x 1m x 0.4m

1.0m x 0.5m x 0.4m
